I build useful digital products at the intersection of business, AI and circularity. Founder of ClosedLoop and part of FoodTracks, with hands-on experience spanning software, customer implementation, data, market validation and startup operations.

01 — EXPERIENCE

ClosedLoop · Münster — My own software company enabling circularity.

- Build products end to end, from market test to shipped software; current work includes EU packaging-regulation tooling and product-lifespan tools.
- Built a six-stage AI document pipeline in Python, Supabase and OpenAI: ingestion → extraction → normalisation → aggregation → rules engine → export.
- Tested three market hypotheses against real demand before building; run the German UG solo across legal, accounting, tax and banking.

FoodTracks · Münster — Fast-paced B2B SaaS startup.

- Work across customer implementations, data and market research, including SQL and operational data flows.
- Build tools for clients and colleagues, including the AI setup and knowledge base the team works with.
- Researched and qualified the Dutch market to support expansion into the Netherlands.

Shypple · Rotterdam — Digital freight forwarder in scale-up.

- Managed the full invoice-posting process with outsourced colleagues overseas and ran process-improvement projects alongside it.

Earlier experience 2016 — 2024

Care assistant · order picker & deliverer · charity sales · waiter · youth event organiser

02 — EDUCATION

MSc Strategic Entrepreneurship

Rotterdam School of Management · 2024 — 2025

Thesis: "Mapping the Mission" — a revised typology of social entrepreneurs

BSc International Business Administration

Tilburg University · 2021 — 2024

Semester abroad: International Christian University, Tokyo (2023)

Bilingual VWO

Kandinsky College, Nijmegen · 2015 — 2021

Cambridge & IB

03 — PROJECTS

CLOSEDLOOP · LIVE

■ PPWR check

Free pre-check of a product against the recycled-content rules in the EU Packaging Regulation.

BROWSER EXTENSION

■ German email corrector

Polishes my German business emails; I use it every day.

CLOSEDLOOP · IN DEVELOPMENT

■ Buffer

Records how a Mac is wearing out, so keeping or replacing it becomes a decision instead of a guess.

CHROME EXTENSION

■ Deep Work Lock

Blocks distractions during focus sessions.

04 — SKILLS

■ Engineering & data

Python · SQL · Supabase/Postgres · Astro · pgvector · data pipelines

■ AI development

Claude Code · Codex · Claude & OpenAI APIs · LLM workflows · retrieval/knowledge bases · prompt engineering

■ Product & business

Market research & validation · customer implementation · product building · startup operations · finance processes · German UG administration
